Statement regarding Product Status: EVA 16 2.0 - Series

Dear Business Partners,

A healthy product lifecycle includes the process of product discontinuation.

For many years, we have manufactured our products reliably and consistently in high quality. Nevertheless, due to current technological advancements, component scarcity, and general price trends in the component sector, we are compelled to replace products with more modern successor products after a long and continuous availability.

With this letter, we inform you about the discontinuation of the EVA 16 2.0 - product series effective **December 31st, 2024** (second generation, also known as RED-Line).

From this point forward, the **EVA 16 2.0 - product series** will no longer be available for marketing or active sales. Naturally, ongoing projects will be completed.

The components of the RED-Line will only be available as spare parts or for the purpose of expanding existing systems and will be supported for a period of 10 years.

As modern successor products, we will focus our marketing efforts on technologically innovative products such as "NEO," "NEO+," "EVAC platforms," or "ONE" in the future.

The following products are part of the EVA 16 2.0 - product series:

- EVA 16 2.0 – Audio Management System (ART05987)
- EVALINE 2.0 - Speaker Line Expansion Module (ART00436)
